

New from ITE!

Manual on Uniform Traffic Control Devices 2009 Edition

The MUTCD 2009 Edition replaces the MUTCD 2003 Edition with Revisions 1 and 2. The MUTCD is incorporated into Federal regulations as the national standard for traffic control devices on all public roads and bike paths. Make sure you have the latest edition. Order your copy today.

Written by the Federal Highway Administration (FHWA), the Manual on Uniform Traffic Control Devices (MUTCD) 2009 Edition is available as a high-quality, printed publication through a cooperative effort between ITE, AASHTO and ATSSA. The printed version includes a comprehensive copyrighted index, high-quality print and color-matched graphics, a lay-flat binding designed to withstand continued use and larger format three-hole drilled pages.

Look for these and many other important changes in the MUTCD 2009 Edition: interim approval process for new traffic control devices; chapter on traffic incident management; section on countdown pedestrian signals; considerations for pedestrians and workers in temporary traffic control zones; provision for in-street pedestrian signs; recommendations for letter height on street name signs; use of yield markings at un-signalized, mid-block pedestrian crosswalks; and provision for high visibility clothing for workers.

ITE Member Price: \$100
Non-member Price: \$120

Pub Code: MUTCD-10
2010; Paperback; 864 pp
