<b>PREFACE</b> .....	ix
Purpose.....	x
Usage .....	x
Scope.....	x
Language and Terminology .....	x
<b>1. PURPOSE AND OVERVIEW</b> .....	1
Need and Purpose .....	1
Major Issues Addressed in Transportation Impact Studies.....	2
Study Timing.....	2
Review Process.....	3
<i>Objectives</i> .....	3
<i>Who Should Prepare Transportation Impact Studies?</i> .....	3
<i>Who Should Review Transportation Impact Studies?</i> .....	3
Ethics and Objectivity .....	4
Report Coverage .....	4
Works Cited .....	4
References for Further Reading.....	4
<b>2. INITIATING TRANSPORTATION IMPACT STUDIES</b> .....	5
Guidelines for Studies.....	5
Extent of Study.....	6
Study Area .....	8
Initiating the Process.....	8
Works Cited .....	10
References for Further Reading.....	10
<b>3. CONTEXT AND FRAMEWORK</b> .....	11
Existing Conditions .....	11
Selection of Horizon Year(s).....	11
<i>Phasing of Large Developments</i> .....	11
<i>Phasing of Major Transportation Improvements</i> .....	11
Peak Traffic Hour(s).....	14
Background Study Area Data .....	14
Review of Anticipated Off-Site Changes.....	19
Field Reconnaissance and Data Collection .....	19
Works Cited .....	20
References for Further Reading.....	20
<b>4. NON-SITE TRAFFIC FORECAST</b> .....	21
Components of Background Traffic .....	21
Methodology .....	21
Build-Up Method Using Specific Development.....	24
<i>Procedures</i> .....	24
Use of Area or Sub-Area Transportation Plan or Modeled Volumes.....	26
<i>Caution</i> .....	26
<i>Guidance</i> .....	27
Trends or Growth Rate Method.....	27
<i>Caution</i> .....	27

<i>Guidance</i> .....	28
Combination of Methods.....	28
Impacts of Transportation System Changes .....	28
Multimodal Aspects .....	30
General Guidelines.....	30
Analysis of Future Conditions.....	30
Works Cited .....	31
<b>5. SITE TRAFFIC GENERATION .....</b>	<b>33</b>
Sources .....	33
<i>State and Local Data Sources</i> .....	33
<i>Existing Data Sources</i> .....	34
<i>Collection of Additional Data</i> .....	35
Selection of Trip Generation Rates or Equations.....	35
<i>Use of Average, Minimum and Maximum Rates</i> .....	35
<i>Use of Equations</i> .....	35
<i>Choosing the Independent Variable</i> .....	37
<i>Choosing the Appropriate Time Periods</i> .....	37
<i>Daily and Seasonal Variations</i> .....	37
<i>Locational Variations</i> .....	38
<i>Age of Database</i> .....	38
<i>Transit, Ridesharing and Other Demand Management Techniques</i> .....	38
<i>Driveway Volumes Versus Traffic Added to Adjacent Streets</i> .....	39
<i>Multi-Use Projects</i> .....	40
<i>Special or Unusual Generators</i> .....	40
<i>Use of Computer Software</i> .....	40
Estimation of Trips Generated .....	41
<i>Concept of Additional Trip Generation</i> .....	41
<i>Development Units</i> .....	41
<i>Computation of Trips to be Generated</i> .....	41
<i>Sample</i> .....	41
Works Cited .....	41
References for Further Reading.....	43
<b>6. SITE TRAFFIC DISTRIBUTION AND ASSIGNMENT.....</b>	<b>45</b>
Distribution Methods.....	45
<i>Analogy</i> .....	45
<i>Trip Distribution Model</i> .....	45
<i>Surrogate Data</i> .....	48
Trip Assignment.....	48
<i>Pass-By Trips</i> .....	51
Redevelopment Projects .....	51
Works Cited .....	54
References for Further Reading.....	54
<b>7. ANALYSIS.....</b>	<b>55</b>
Identification of Impacts, Needs and Common Deficiencies .....	55
Traffic Analysis.....	56
<i>Total Traffic Estimate</i> .....	56
<i>Guidelines</i> .....	56
<i>Level of Service—Intersection Capacity Analysis</i> .....	56
<i>Level of Service—Roadway Segment Analysis</i> .....	62
Multimodal Analysis.....	67

<i>Nonmotorized/Transit Trip Generation, Distribution and Assignment</i> .....	67
<i>Level of Service – Transit</i> .....	68
<i>Level of Service – Pedestrians</i> .....	68
<i>Level of Service – Bicycles</i> .....	69
<i>Quality of Service – Multimodal Analysis</i> .....	69
<i>Multimodal Trade-Offs</i> .....	70
<i>Trip Reduction and Transportation Demand Management</i> .....	71
<i>Applicability and Effectiveness</i> .....	72
<i>Estimation of Effectiveness</i> .....	72
Safety .....	74
<i>Motorized Vehicles</i> .....	74
<i>Pedestrians and Bicycles</i> .....	74
Formulation of Mitigation Alternatives .....	74
Works Cited .....	75
References for Further Reading.....	76
<b>8. SITE ACCESS AND OFF-SITE IMPROVEMENTS</b> .....	<b>77</b>
Establishment of Goals .....	77
Recommendations .....	77
Principles of Access Management.....	78
Access Design Objectives .....	79
<i>Network Improvements</i> .....	79
<i>Localized Improvements</i> .....	79
<i>Site-Specific Access Improvements</i> .....	84
<i>Nonroadway Transportation Improvements</i> .....	84
<i>Program Improvements</i> .....	87
Improvement Implementation Schedule .....	89
Reviews .....	89
Works Cited .....	89
References for Further Reading.....	89
<b>9. ON-SITE PLANNING AND PARKING PRINCIPLES</b> .....	<b>91</b>
Approach to Site Planning .....	91
On-Site Planning Principles .....	92
<i>Access Points</i> .....	92
<i>Vehicular Queuing Storage</i> .....	93
<i>Internal Vehicular Circulation</i> .....	93
<i>Traffic Calming/Speed Control</i> .....	93
<i>Service and Delivery Vehicles</i> .....	94
<i>Building Service Drives</i> .....	95
<i>Signs and Pavement Markings</i> .....	95
<i>Parking</i> .....	95
<i>Pedestrian, Transit, Bicycle and Accessible Facilities</i> .....	95
Works Cited .....	96
References for Further Reading.....	96
<b>10. REPORT</b> .....	<b>99</b>
Purpose and End Uses .....	99
Presentation .....	99
Executive Summary.....	100
Checklist.....	100
Sample Report Outline.....	100
Report Certification .....	100

<b>APPENDIX A—BACKGROUND LITERATURE .....</b>	<b>107</b>
<b>APPENDIX B—BIBLIOGRAPHY .....</b>	<b>111</b>
<b>TRIP GENERATION DATA FORM.....</b>	<b>125</b>
<b>USER COMMENTS FORM .....</b>	<b>129</b>
