Foreword.....	xix
Acknowledgments.....	xxi
CHAPTER 1: INTRODUCTION TO TRAFFIC ENGINEERING	1
Walter H. Kraft, D.Eng.Sc., P.E., President, Walter H. Kraft and Associates LLC	
What is Traffic Engineering?	1
ITE's Role	2
Scope of the Publication	2
The Future of Traffic Engineering	3
CHAPTER 2: ROAD USERS	5
Alison Smiley, Ph.D., CCPE, President, Human Factors North Inc. Robert E. Dewar, Ph.D., CPE, CCPE, President, Western Ergonomics Inc.	
I. Introduction.....	5
II. Basics.....	5
<i>A. Fundamental Road User Characteristics and Limitations</i>	<i>5</i>
<i>B. Road User Types</i>	<i>14</i>
III. Current Practice	24
<i>A. Positive Guidance.....</i>	<i>24</i>
<i>B. TCDs.....</i>	<i>25</i>
<i>C. Intersections and Roundabouts.....</i>	<i>31</i>
<i>D. Railroad Grade Crossings</i>	<i>34</i>
<i>E. Interchanges.....</i>	<i>35</i>
<i>F. Road Segments</i>	<i>36</i>
<i>G. Work Zones</i>	<i>39</i>
IV. Emerging Trends.....	40
<i>A. Human Factors Studies as a Basis for Sight Distance Standards</i>	<i>40</i>
<i>B. Self-Explaining Roads</i>	<i>41</i>
<i>C. ITS.....</i>	<i>42</i>
<i>D. Human Factors and Safety Tools</i>	<i>42</i>
V. Information Sources.....	43
References.....	44
CHAPTER 3: VEHICLES.....	57
Karl Zimmerman, Ph.D., P.E., Assistant Professor of Civil Engineering, Valparaiso University	
I. Introduction.....	57
II. Vehicle Types	57
<i>A. Passenger Cars.....</i>	<i>57</i>
<i>B. Light Trucks</i>	<i>58</i>

C. Single-Unit Trucks.....	58
D. Combination Trucks.....	58
E. RVs.....	62
F. Motorcycles.....	62
G. Bicycles.....	62
H. Fleet Vehicles.....	63
III. Basic Vehicle Operation.....	64
A. Current Propulsion Systems.....	64
B. Vehicle Performance.....	65
IV. Current Vehicle Fleet.....	78
A. Vehicle Use.....	78
B. Vehicle Age.....	79
C. Emissions.....	79
D. Performance.....	80
E. Safety.....	81
V. Emerging Trends.....	82
A. Vehicle Dimensions.....	82
B. Alternative Fuels.....	82
C. Technological Innovations.....	87
VI. Information Sources.....	90
References.....	91

CHAPTER 4: TRAFFIC AND FLOW CHARACTERISTICS 93

Brian Wolshon, Ph.D., P.E., PTOE, Department of Civil and Environmental Engineering,
Louisiana State University

I. Basics.....	93
A. Traffic Stream Parameters and Measurement.....	93
B. Basic Traffic Stream Models.....	103
C. Traffic Shockwaves.....	106
D. Traffic Characteristics on Interrupted Flow Facilities and at Bottlenecks.....	108
E. Traffic Stream Composition.....	112
II. Current Practice.....	112
A. Capacity and LOS Concepts.....	112
B. Capacity and LOS Computation.....	116
III. Emerging Trends.....	130
A. Traffic Simulation Fundamentals.....	130
B. Scales of Traffic Simulation.....	131
C. Traffic Visualization.....	133
IV. Information Sources.....	133
A. Published Sources.....	133
B. Internet Resources.....	134
References.....	134

CHAPTER 5: SAFETY	137
Eugene M. “Gene” Wilson, Ph.D., P.E., PTOE, Transportation Engineering Educator and Safety Consultant	
Martin E. Lipinski, Ph.D., P.E., PTOE, Professor of Civil Engineering, University of Memphis	
I. Basics	137
A. <i>The Problem—Globally and in the United States</i>	137
II. Current Practice	138
A. <i>Quantifying Safety Approaches</i>	138
B. <i>Summary of the Data</i>	144
C. <i>Evaluation and Selection of Countermeasures</i>	144
III. Proactive Safety Approaches	148
A. <i>Definition of an RSA</i>	149
B. <i>Stages of an RSA</i>	149
C. <i>Steps in Conducting an RSA</i>	149
D. <i>Costs and Benefits</i>	150
E. <i>Key Considerations</i>	151
IV. Focus Areas	151
A. <i>Low-Cost Safety Improvements</i>	151
B. <i>Intersection Safety Improvements</i>	152
C. <i>Roadside Safety</i>	152
D. <i>Non-Motorist (Pedestrian and Pedalcyclist) Safety</i>	153
E. <i>Work Zone Safety</i>	154
V. Emerging Trends	155
A. <i>Safety Management Systems and Highway Safety Improvement Programs</i>	155
B. <i>AASHTO SHSP</i>	157
C. <i>Interactive Highway Safety Model</i>	158
D. <i>Changing the Safety Culture</i>	159
E. <i>Marketing Safety</i>	159
VI. Information Sources	159
A. <i>World Wide Web</i>	159
References	162
CHAPTER 6: PROBABILITY AND STATISTICS	165
Babu K. Veeregowda, P.E, PTOE, Partner and Senior Vice President, Eng-Wong, Taub and Associates	
Gautam Bharali, Ph.D., Assistant Professor, Department of Mathematics, Indian Institute of Science	
Simon Washington, Ph.D., Professor, Department of Civil and Environmental Engineering, Arizona State University	
I. Introduction	165
II. Basics	165
A. <i>Measures of Central Tendency</i>	166
B. <i>Properties and Uses of Central Tendency</i>	168
C. <i>Measures of Variation</i>	169
D. <i>Grouping of Data</i>	173

E. Basic Probability Concepts	175
III. Current Practice.....	177
A. The Binominal Distribution.....	177
B. The Poisson Distribution as a Limiting Case of the Binomial Distribution.....	178
C. Normal Distribution.....	182
D. Confidence Intervals.....	184
E. Hypothesis Testing.....	187
F. Linear Regression.....	194
G. Hypothesis Testing Revisited: Nonparametric Methods.....	197
H. Basic Sampling Strategies.....	202
I. Outliers and Data Errors.....	206
IV. Emerging Trends.....	207
A. The Influence of Bayesian Methods and Markov-Type Stochastic Processes	208
References	209

CHAPTER 7: GEOMETRIC DESIGN FOR TRAFFIC..... 211

Eric T. Donnell, Ph.D., P.E., Assistant Professor, Department of Civil and Environmental Engineering, The Pennsylvania State University
John M. Mason Jr., Ph.D., P.E., Professor of Civil Engineering and Director, Pennsylvania Transportation Institute, The Pennsylvania State University

I. Introduction	211
A. Transportation Project Development Process.....	211
B. Role of Geometric Design in Transportation Project Development	213
C. Use of Geometric Design Policies and Supplemental Guidance Documents	214
D. Applying Design Concepts	216
II. Basics	216
A. Functional Classification of Highways and Streets.....	216
B. Design Controls and Criteria.....	217
C. Design Elements.....	222
III. Current Practice.....	256
A. Context-Sensitive Solutions.....	256
B. Case Study Example of Context-Sensitive Design	258
C. Design Exception Practices	259
IV. Emerging Trends.....	260
A. Design Consistency	260
B. Safety Prediction.....	260
C. Operational Performance	263
D. Visualization in Highway and Street Design	265
V. Summary	265
Acknowledgments	266
References	266

CHAPTER 8: TRAFFIC ENGINEERING STUDIES	269
Joseph E. Hummer, Ph.D., P.E., Professor of Civil Engineering, North Carolina State University	
I. Introduction	269
II. Basics	270
III. Current Practice	273
A. <i>Common Studies</i>	273
B. <i>Data Management</i>	290
IV. Emerging Trends	292
A. <i>Equipment</i>	293
B. <i>Data Management</i>	293
V. Information Sources	293
References	295
CHAPTER 9: PLANNING FOR OPERATIONS	297
John Mason, Director, Transportation Policy and Analysis, Science Applications International Corporation	
Wayne Berman, Transportation Specialist, Federal Highway Administration Office of Operations	
I. Introduction	297
II. Basics—Planning for Operations at a Glance	300
A. <i>What Is Planning for Operations?</i>	300
B. <i>Why Do Planning for Operations?</i>	300
C. <i>What Are the Benefits of Planning for Operations?</i>	301
III. Current Practice—How to Do Planning for Operations— Techniques that Facilitate Planning for Operations	302
A. <i>The Transportation Planning Process</i>	302
B. <i>Opportunities to Coordinate Planning and Operations</i>	304
IV. Emerging Trends	320
V. Information Resources	322
A. <i>Information Sources</i>	322
References	323
CHAPTER 10: MANAGING TRAFFIC DEMAND TO ADDRESS CONGESTION: PROVIDING TRAVELERS WITH CHOICES	325
Grant Zammit, Systems Operations Specialist, Federal Highway Administration	
Eric N. Schreffler, Transportation Consultant, ESTC	
I. Basics	325
A. <i>Congestion Management Requires Demand Management</i>	325
B. <i>The Demands of the Past</i>	326
C. <i>What Affects Demand and Congestion?</i>	328
D. <i>Relating to Tradition</i>	329
II. Current Practice	329
A. <i>Applications of TDM</i>	330
III. Emerging Trends	341

A. <i>Sample Techniques—Infrastructure and Operational</i>	342
B. <i>Sample Techniques—Financial and Institutional</i>	344
C. <i>Analyzing for a Decision</i>	348
D. <i>Opportunity</i>	350
IV. Information Sources	350
References	351

CHAPTER 11: SIGNS AND PAVEMENT MARKINGS 355

Robert Seyfried, P.E., PTOE, Director of Transportation Engineering Programs,
Northwestern University Center for Public Safety

I. Basics	355
A. <i>Road User Information Needs</i>	355
B. <i>Manual on Uniform Traffic Control Devices</i>	356
II. Current Practice	357
A. <i>Signs</i>	357
B. <i>Sign Retroreflectivity</i>	359
C. <i>Signing Applications</i>	364
D. <i>Sign Installation Practices</i>	372
E. <i>Pavement Markings</i>	376
F. <i>Pavement Marking Applications</i>	381
G. <i>Sign and Pavement Marking Inspection and Maintenance Systems</i>	385
III. Emerging Trends	391
A. <i>Older Drivers and Pedestrians</i>	391
B. <i>Intelligent Transportation Systems</i>	392
IV. Information Sources	393
A. <i>Works Cited</i>	393
B. <i>References for Further Reading</i>	394
References	395

CHAPTER 12: TRAFFIC CONTROL SIGNALS 397

Frank D. Dobiszewski, P.E., PTOE, Vice President—Engineering, Jen Electric Inc.
Lynn A. LaMunyon, P.E., PTOE, Principal, CMX

I. Introduction	397
II. Basics	397
A. <i>Definitions Arranged by Related Usage</i>	397
B. <i>Overview</i>	403
C. <i>Signal Justification Engineering Study</i>	405
III. Current Practices	407
A. <i>Operations</i>	408
B. <i>Design Considerations</i>	417
C. <i>Types of Equipment</i>	427
D. <i>Temporary and Portable Traffic Signals</i>	446
E. <i>Beacons</i>	447

<i>F. Lane-Use Control Signals</i>	447
<i>G. Ramp-Metering Signals</i>	449
<i>H. Control at One-Lane, Two-Way Facilities</i>	449
<i>I. Signal Monitor Units (Conflict Monitors)</i>	449
<i>J. Electrical Protection Devices</i>	450
III. Emerging Trends.....	450
<i>A. Pedestrian Countdown Signals</i>	450
<i>B. Vandal-Resistant Pushbuttons with Latching LEDs</i>	450
<i>C. Global Positioning System Clocks</i>	450
<i>D. Flashing Yellow Arrow Signal Indications</i>	451
<i>E. Pending ADA Signal Requirements</i>	451
IV. Information Sources	451
<i>A. Related Technical Documents</i>	451
<i>B. Publications</i>	451
<i>C. Organizations to Contact</i>	452
References	453
CHAPTER 13: ACCESS MANAGEMENT.....	455
Philip Demosthenes, Senior Planner, Parametrix Consulting	
Vergil G. Stover, Ph.D., P.E., Professor Emeritus of Urban Planning and Civil Engineering, University of South Florida	
I. Introduction	455
II. Historical Perspective	457
III. Legal Issues in Access Management.....	458
IV. Current Practice	459
<i>A. Background</i>	459
<i>B. Programs and Policies</i>	459
<i>C. Access Program Structure</i>	460
<i>D. Design Practices</i>	460
V. Emerging Trends	468
VI. Information Sources.....	468
References	470
CHAPTER 14: PARKING	473
Ransford S. McCourt, P.E., PTOE, Principal, DKS Associates	
I. Basics.....	473
<i>A. Definitions</i>	473
II. Current Practice	475
<i>A. User Characteristics</i>	475
<i>B. Types of Parking</i>	479
<i>C. Dimensions</i>	481
<i>D. Layout</i>	486
<i>E. Vehicle Access</i>	496

F. Pedestrian Access	504
G. ADA	505
H. Bicycle Issues	508
I. Transit Issues	511
J. Freight and Loading Issues	513
K. Safety/Security	515
L. Signs	519
M. MUTCD	519
N. Wayfinding	521
III. Emerging Trends	523
A. Smart Parking Pay Stations Replacing Parking Meters	523
B. APMS	524
C. Mechanical Parking Systems	524
D. The Return to Small Cars	525
E. Green Parking	525
IV. Information Sources	526
References	527
CHAPTER 15: TRAFFIC CALMING	531
Reid H. Ewing, Ph.D., Professor, Rutgers Transportation Policy	
Jeff Gulden, Transportation Engineering, Fehr & Peers Associates Inc.	
I. Introduction	531
A. Purpose	531
B. Relationship to Other ITE Documents and Design Practices	532
II. Basics	533
A. The Right Process	533
B. The Right Tools	541
III. Current Practices	558
A. Design	558
B. Signing and Marking	569
IV. Emerging Trends	573
A. New Engineering Techniques and Technologies	573
B. Emerging Enforcement Technologies	576
C. New Analysis Tools	577
D. Bicycle Boulevards	578
E. Pedestrian Priority Streets	579
F. Topics of Research	581
V. Information Sources	582
References	583

CHAPTER 16: EFFECTIVE COMMUNICATION FOR TRANSPORTATION PROJECTS..... 585

Dana Newsome, Southeast Region Public Involvement Manager, HNTB Corporation

I. Basics.....	585
A. <i>Introduction to Transportation Communications</i>	585
B. <i>Public Involvement</i>	585
C. <i>Public Outreach</i>	586
D. <i>Media Relations</i>	587
E. <i>Public Affairs</i>	587
F. <i>Internal Communications</i>	587
G. <i>Staffing</i>	590
H. <i>Communication Tools and Audiences</i>	590
I. <i>Conclusion</i>	592
II. Current Practice.....	592
A. <i>Detailed Communications Planning: A Checklist</i>	592
B. <i>Successful Media Interviewing</i>	592
C. <i>Effective Media Writing</i>	594
D. <i>Major-Event Planning and Execution for Transportation Projects</i>	596
E. <i>Photography Tips and Tools</i>	599
F. <i>Presentation and Public Speaking Guidelines</i>	599
G. <i>Writing Effectively: Tips for Stronger Writing</i>	601
H. <i>Communications Action Plan Example</i>	602
I. <i>Case Study</i>	603
J. <i>On the Road Again: Reaching Rural Communities</i>	604
III. Emerging Trends.....	606
A. <i>Technology and Trends</i>	606
B. <i>Computer Models and Animations</i>	607
IV. Information Sources.....	608
A. <i>Resources and Web Sites for Reference</i>	608
Appendix.....	609

CHAPTER 17: TRAFFIC REGULATION AND CONTROL..... 613

Kay Fitzpatrick, Ph.D., P.E., Senior Research Engineer, Texas Transportation Institute

Gerald Ullman, Ph.D., P.E., Senior Research Engineer, Texas Transportation Institute

I. Basics.....	613
A. <i>Purpose of Traffic Regulations</i>	613
B. <i>Federal Legislation</i>	613
C. <i>State and Local Legislation</i>	615
D. <i>Uniformity of Traffic Regulations</i>	615
E. <i>Legal Responsibility of Public Agencies and Roadway User</i>	616
F. <i>Americans with Disabilities Act</i>	617
II. Current Practice.....	618
A. <i>Lane Regulation and Control</i>	618
B. <i>Intersection Regulation and Control</i>	629

C. <i>Speed Regulations</i>	635
D. <i>Emergency Condition Regulations and Control</i>	641
III. <i>Emerging Trends</i>	644
A. <i>Managed Lanes</i>	644
B. <i>Area-Wide Congestion Pricing</i>	645
C. <i>Speed Management</i>	645
D. <i>Enforcement Technologies</i>	646
IV. <i>Information Sources</i>	647
A. <i>Works Cited</i>	647
B. <i>References for Future Reading</i>	651
References	651

CHAPTER 18: MAINTENANCE-OF-TRAFFIC DESIGN AND CONSTRUCTION STAGING 655

David R. McDonald Jr., Ph.D., P.E., PTOE, Senior Transportation Engineer/
Project Manager, Hanson Professional Services Inc.

Amber Huckfeldt, Transportation Engineer, Hanson Professional Services Inc.

I. <i>Introduction</i>	655
II. <i>Basics</i>	655
A. <i>Terminology</i>	655
B. <i>Speed and User Vehicle</i>	656
C. <i>Horizontal Geometrics</i>	656
D. <i>Vertical Geometrics</i>	660
E. <i>Cross-Sectional Elements</i>	660
F. <i>Delineating and Communicating</i>	669
G. <i>Upkeep</i>	673
III. <i>Design Resources</i>	674
IV. <i>Staging Plans</i>	675
A. <i>Sequencing</i>	675
B. <i>Traffic Control Plan Elements</i>	676
C. <i>Urban Versus Rural</i>	680
V. <i>Current Practice</i>	681
A. <i>Detours</i>	681
B. <i>Traffic Management Analysis</i>	681
C. <i>Construction by Halves</i>	682
D. <i>Staged Construction</i>	683
E. <i>Incident Management</i>	683
F. <i>Emergency Stop Lanes</i>	683
G. <i>Special Provisions, Notes and Narratives</i>	684
VI. <i>Emerging Trends</i>	685
A. <i>Night Work</i>	685
B. <i>Noise Requirements</i>	686
C. <i>Performance Specifications</i>	686
D. <i>Lane Rental, User Cost and User Delay</i>	686

<i>E. Lane Closures</i>	687
<i>F. Transportation Management Plans</i>	688
<i>G. Speed Control</i>	688
VII. Information Sources.....	689
<i>A. Recommended Reading</i>	691
References.....	692
Index	696
