

County Roads

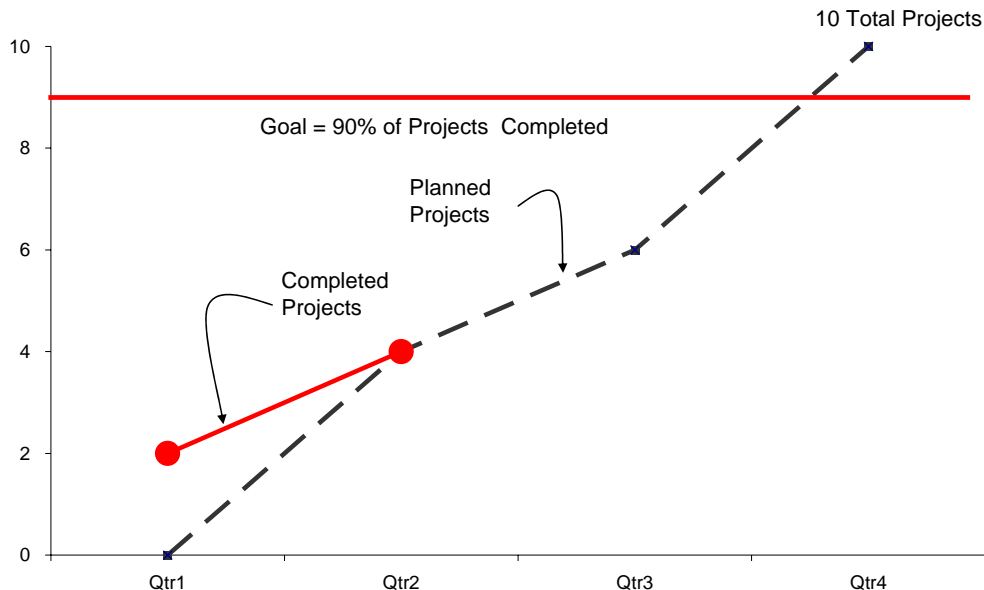

Performance Measure - Projects Completing Construction vs. Planned

The improvement of County Roads is accomplished by construction contracts employing private sector contractors. These contractors are given specific amounts of time to accomplish the work when they are awarded the contract. To ensure that this work occurs in a timely manner and uses tax payer's money wisely, engineers oversee these construction contracts.

The completion of these contracts is measured by when the project is substantially completed and open to traffic. We compare this date with the quarter in which the project was planned to be completed.

Transportation Construction Projects

Cumulative Construction Projects Completed vs. Actual
2006, Quarter 2 ending June 30

Performance Goal:

Complete construction on at least 90% of the projects planned to be completed.

The graph above displays the number of cumulative planned projects and current projects completed by quarter for 2006. As of quarter two, all projects are completed as planned.
