Siva –

My suggested wording would be:

On May 31, 2006 NEMA reported to the ITE staff that NEMA had a successful letter ballot, along with a comment matrix, and asked for a Comment Disposition Report from the ATC Controller Working Group. The contractor (James Kinnard) reviewed each item and updated the document to become Rev 5.2b. On September 25, 2006 the ITE Staff convened a teleconference of the ATC Controller Working Group, which approved by ballot the following:

1. All of the items listed on the NEMA comment matrix.
2. The work of the Contractor to incorporate the comment matrix items into the Rev 5.2b document.
3. The correction of typographical errors in Table 7.1 reported by Ralph Boaz
4. The correction of typographical error in "extinguish backlight" entry in Table 7 reported by Jim Rose

Vickie reported that she plans to forward this Comment Disposition Report, along with the ATC Rev 5.2b document dated September 25, 2006 to the NEMA Codes and Standards Committee for approval.

Regards,

Dave

Dave:

Can you just write a sentence or two on the resolution that was passed at the ATC WG today.
Regards
