GENERAL NOTES

1. Unless otherwise specified, driveways shall be 6' thick.

2. Two-inch deep transverse contraction joints shall be placed in driveways if the driveway width is over 20'. If the driveway thickness is greater than 6', then the contraction joint depth shall be 2/3, where 1 is the thickness of the driveway. Joints shall be either formed or keyed. Forged joints shall be finished with a tool having a 3/4" radius. See Sheet 2 of 2 for the Contraction Joint Detail.

3. Expansion joints shall be located between driveways and sidewalks and at abutting structures. The J X joint filler shall extend the full width of the concrete. See Sheet 2 of 2 for the Expansion Joint Detail.

4. Concrete shall be finished by means of a float, then steel troweled and then broomed with a fine brush in a transverse direction.

LEGEND

- Minimum slope = 0.02' Per Ft
- Maximum slope = 0.02' Per Ft
- Straight grade with downward slope
